

Abdul Fikri

Software Engineer — Full Stack Developer

+62 812 3639 2504

fikri.abdul.jp@gmail.com

Professional Summary

Fullstack Software Engineer with 10+ years of experience designing and developing web applications, APIs, databases, and enterprise software solutions for governments, UN agencies, international NGOs, and independent products. Strong hands-on experience with Next.js, React, TypeScript, Tailwind CSS, PostgreSQL, Prisma, FastAPI, and REST APIs, with current focus on building full-stack and AI-powered applications. Experienced across the full software development lifecycle, from system architecture and database design to application development, API integration, testing, deployment, and production support.

Technical Skills

- **Frontend:** React, Next.js, TypeScript, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Responsive Design
- **Backend & APIs:** FastAPI, Python, Node.js, PHP, Laravel, Django, RESTful APIs, Auth Systems, JSON
- **Databases & ORM:** PostgreSQL, Prisma, MySQL, Schema Design, Data Modeling
- **AI & Automation:** AI-Powered Applications, AI/ML API Integration, Workflow Automation
- **Software Engineering:** Software Architecture, System Analysis, Requirements Engineering, SDLC, QA Testing
- **DevOps & Tools:** Git, Docker, Linux, Redis

Professional Experience

Independent Software Engineer & Product Developer

Independent Product Development & Consulting

Indonesia

Apr 2026 – Present

- Design and develop proprietary software products using TypeScript, Next.js, React, Tailwind CSS, Prisma, PostgreSQL, and FastAPI.
- Build full-stack applications covering frontend development, backend services, database architecture, API development, authentication, and application workflows.
- Design and implement PostgreSQL data models and database access layers using Prisma.
- Develop backend APIs and services using FastAPI and integrate them with Next.js applications.
- Build and integrate AI powered functionality and automation into software products and application workflows.
- Provide software development consulting for clients building applications with Next.js and TypeScript.
- Work across the complete development lifecycle, from requirements and architecture through development, testing, deployment, and iterative improvement.

Program Specific Researcher (Database Officer)

Maritime Asian Heritage Survey (MAHS)

Kyoto, Japan

Dec 2024 – Mar 2026

- Managed structured heritage datasets and web applications database operations within the Arches platform
- Designed and maintained database schemas aligned with evolving operational and research requirements
- Implemented data validation routines and web applications workflows supporting data quality and consistency
- Supported structured data ingestion, metadata standardization, and extraction pipelines
- Resolved database integrity issues and supported internal reporting and analysis workflows
- Produced technical documentation covering database structures and operational procedures

Software Engineering Specialist (Data Systems & Architecture)

BNPB – Indonesian Disaster Resilience Initiative Project

Aug 2023 – Jan 2024

- Contributed to web applications and system architecture planning for the national Multi-Hazard Early Warning System platform
- Prepared Software Requirements Specifications (SRS) for implementation vendors
- Conducted gap analysis across web applications workflows, subsystem integration, and operational processes
- Supported integration activities across engineering vendors and government technical teams

Digital Information Systems Consultant

Independent Consultant

Feb 2023 – Oct 2023

- Designed and developed full-stack web applications supporting health monitoring and government budget reporting
- Built frontend interfaces using JavaScript and backend services using Laravel and MySQL
- Designed relational databases and implemented RESTful APIs
- Collaborated with infrastructure engineers during deployment and production rollout
- Produced technical documentation and performed application testing prior to deployment

Technology Consultant

Madani Berkelanjutan

May 2022 – Jan 2023

- Contributed to software architecture and web applications platform planning supporting digital transformation initiatives
- Coordinated implementation activities related to platform infrastructure and web applications services
- Supported workflow optimization through scalable digital systems and fullstack solutions
- Managed technical coordination and implementation priorities across multiple initiatives

Full Stack Programmer

UNICEF Indonesia

Jun 2021 – Dec 2021

- Developed frontend and backend enhancements for national monitoring dashboards used by government stakeholders
- Built and customized web application features integrating REST APIs and government information systems
- Improved dashboard usability through UI enhancements and workflow optimization
- Developed technical documentation, user manuals, and training materials supporting nationwide rollout
- Troubleshoot production issues and implemented application enhancements across frontend and backend components

- Supported RapidPro and ONA digital solutions for data collection and reporting

Database Management Consultant

Save the Children Indonesia

Jan 2021 – May 2021

- Designed and implemented fullstack workflows supporting information management and visualization systems
- Built structured data processing pipelines supporting real-time mobile data collection
- Developed automated reporting workflows supporting operational indicator monitoring
- Improved accessibility and reliability of operational datasets

ICT Associate

UNICEF

Dec 2018 – Dec 2020

- Supported enterprise ICT operations and backend database lifecycle management
- Contributed to ECM and MFA implementation projects
- Maintained internal information systems and technical operational documentation

Database System Administrator (RAMS Platform)

International Organization for Migration (IOM)

Apr 2017 – Mar 2018

- Administered RAMS enterprise database platform supporting migration operations
- Maintained database integrity, security access controls, and web applications operational workflows
- Developed enhancements across database and web service components
- Processed structured datasets using Python pandas supporting SQL ingestion workflows
- Produced technical documentation and delivered user training

Individual IT Consultant

Jan 2010 – Dec 2016

- Designed database-driven web applications systems for monitoring and reporting applications
- Developed web application logic using Laravel and SQL-based technologies
- Implemented structured data processing and reporting workflows supporting analytics outputs
- Coordinated web application deployment and infrastructure setup with DevOps engineers

Education

Postgraduate in Entrepreneurship and Innovation

University of Adelaide, Australia

Bachelor of Applied Computer Science

Free University of Bozen-Bolzano, Italy

Languages

English – Professional Proficiency

Awards

Provincia Autonoma Di Bolzano Scholarship – Italy

Australian Development Scholarship – Australian Government
